Course Descriptions:	Media today is a primary source of information and knowledge for everyone, particularly students. This in turn shapes their attitudes and values. Bearing this in mind this course will focus on “teaching with and about media” based on changing conceptions of pedagogy and learning processes. In other words, the pedagogical process will have its base in the expanding domain of the media and provide students opportunities to work with authentic texts. Language learning will not only be made relevant and engaging but raise critical awareness, and offer hands on experience through creative and collaborative tasks. The “anywhere-anytime” method of learning, and incorporating rich and varied texts available through media would enhance and develop language use in the ELT classroom.
Evaluation Scheme	Internal evaluation will be of 40% marks for test, project/presentations; external evaluation of 60% for a final end-semester examination.
